Letter of the Presidents

WHY A FESTIVAL?

After the great and unexpected success of the first National Online Event, *"We are back ... we are connected"*, that took place in Rome last October and in the current global health pandemic and not yet being able to organize in presence this year the coveted and dreamed **"1st ANNUAL MEETING of SIAGASCOT"**, we thought to offer our members and the Orthopaedic Scientific Community, a new initiative. The goal of this meeting is not only to "brighten" this first part of the year in which we still struggle with the raging pandemic but, above all, to offer a distinguished and innovative meeting with a modern "format", suitable for the technologies and forms of communication most used in this historical period.

So not a traditional online meeting, not an over and overseen webinar, but an INTERNATIONAL FESTIVAL!

A scientific event that can contain and collect many different and stimulating proposals. An event to be enjoyed online, but not only, as a part of round tables, mini-battles and interviews will be performed "live" on the stage of the "Teatro dei Martinitt", in Milan and in which program you may also find Sessions recorded in other prestigious Italian scientific locations, such as the Rizzoli Institute of Bologna and the University Hall of UNICAMPUS in Rome.

An extraordinarily various and captivating scientific proposal, in which each participant will find something exciting or instructive to listen to.

Each Session will be a container of different scientific offers (Highlight Lectures, reports, relive surgery, mini-battles, round tables) and so much more. The scientific program will run along two lines (**the Festival** and **the Other Festival**). The different Sessions alter with interviews of great national and international experts, education courses, Highlight Lectures held by great masters, Awards sessions dedicated to young surgeons and clinical cases.

In conclusion, a Festival where you can satisfy your curiosity, have fun, train and above all learn. Once again, SIAGASCOT has put itself on the field with all its men's energy, imagination, competence, and scientific and professional skills. We are waiting for you to be numerous and connected on... **March 19-20, 2021** because, to paraphrase the slogan of a very famous Italian Festival... **"SIAGASCOT is SIAGASCOT"!**
